

TECHNICAL INFORMATION

MTQ Compost St-Henri

(0.30-0.10-0.10)

Product : 390112
Batch : 2022

BENEFITS

- Increases the organic matter
- Increases the soil water-retention capacity
- Supplies the nutrients essential for growth of plants and development of soil micro-organisms
- Compost is made of recycled green residues

COMPOSITION

- Compost (leave, grass, food scraps and ligneous matters)
- Sphagnum peat moss

MINIMUM GUARANTEED ANALYSIS (WET BASE)

Type	
Total nitrogen (N)	0.30%
0.15% water-insoluble nitrogen	
Available phosphoric acid (P₂O₅)	0.10%
0.12% average total phosphoric acid	
Soluble potash (K₂O)	0.10%
Organic matter	14%
Maximum moisture content	60%

ANALYSIS (DRY BASE)

Type	
pH	6.5-8.0
C/N ratio	15-25
Organic matter (dry base)	25 %

DIRECTION FOR USE

Intended use : Recovery of rockfill and disturbed shorelines.

Period of application : Before sowing, hydraulic seeding or any other planting.

Maximal dose* : 0.32 m³/m² ou 18 - 24 yd³/1000 ft² (corresponds to a thickness of 32 cm).

*** Maximum application to meet the requirements for cumulative additions of trace elements to the soil (circular to profession T-4-93) over a 45 years period.**

Bulk product

The estimate weight of the product appears on the bill of lading supplied by the carrier at the time of delivery

Due to the origin of the materials used for its manufacture (municipal collection of organic materials) and despite the fact that the product is finely sieved, there could be the presence of small foreign bodies.

Notice - the application rate shall be in accordance with provincial or territorial regulations related to fertilizer element or trace element applications to soil, as well as the fertilizers act and fertilizers regulations.
