At Englobe, we dare to rethink the way we do things. We care deeply about tangible, practical change that makes the future better. We exist to help our Clients and our communities build sustainability. Every project counts. Every day.

Englobe is a leading provider of specialty environmental and engineering services, supporting infrastructure development for public and private sector Clients.

Englobe has been developing and mastering the composting process to transform a wide range of organic materials and residuals into value-added products. Our expertise enables us to produce high quality Compost and products that are used in both Horticulture and Agriculture to build healthy soils, enhance soil organic carbon (SOC), and help regenerate degraded soils.

### COMPOSTING IN ONTARIO

Englobe provided notification of the leaf and yard composting operations to the Ministry of the Environment, Conservation and Parks, with specification that the site will accept leaf and yard trimmings and clean wood only. The site is designed to process 30,000 metric tons of inbound materials. Mature and certified compost will be available in 2024.

### SERVICES

- Certified weigh scale on site
- Traceability throughout the process
- Production of CQA (Compost Quality Alliance) certified compost
- Secure and safe environment for materials reception, processing, and product sales

### ACCEPTED FEEDSTOCKS

- Feedstocks maybe collected in bulk or paper bags only
- Leaves, grass clippings, woody materials and shrub trimmings, fruits and vegetables from gardens, flowers, natural Christmas trees; and similar organic plant materials generated from gardening and yard maintenance activities at residential and other properties
- Stems, twigs, and branches no more than 7 cm in diameter
- Bulking amendments from clean wood (not painted, treated/preserved, glued or laminated) and natural wood (tree limbs, branches, trunks)
- For all other subjects, contact us

**ENGLOBE**
